

Product Documentation

Welcome to the technical documentation for our product.

Email: 23f1001052@ds.study.iitm.ac.in

Product Overview

- High-performance
- Scalable architecture
- Easy-to-use API
- Fully documented

Algorithm Complexity

The sorting algorithm has average complexity:

$$T(n) = O(n \log n)$$

Worst-case complexity:

$$T(n) = O(n^2)$$

Example API Usage

```
def compute_factorial(n):  
    if n == 0:  
        return 1  
    return n * compute_factorial(n-1)  
  
print(compute_factorial(5))
```
